Application number: JP19990092509 19990331
Priority number(s):

Abstract of JP2000286939

PROBLEM TO BE SOLVED: To provide a portable wristwatch radio telephone set which can secure both voice sending and receiving operations at a time in a natural posture of a user and without howling, etc., and also reducing the troublesomeness caused when it is worn to carry and use.

SOLUTION: This wristwatch radio telephone set has a main body 2 which includes a radio transmitting/receiving part and a power supply, a wristband 3 which matches the part 2, includes a speech sending part, connects electrically the part 2 to the voice sending part and functions to wear the part 2 on the wrist of a user, a speech receiving part 4 which has a special shape so as to be worn on a finger tip of the user and a cable 5 which connects electrically the part 2 to the part 4.
